## SUMMARY

Enthusiastic Back end Developer passionate about contributing to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of problem solving and implementation of the program. Motivated to learn, grow and excel in technology development.

With an extensive skill set in programming, I possess a diverse range of technical abilities that allow me to navigate through the intricacies of software development. From backend development, where I architect the core functionality of applications, to fullstack development, where I can seamlessly bridge the gap between the server and the user interface, I am well-versed in multiple layers of the development stack.
